

Hi, I am a multidisciplinary designer based in Navi Mumbai specializing in User Experience and User Interface. I strive to blend innovation and digital craftsmanship in my work to make beautiful and cohesive user experiences through deliberate and passionate design. Throughout the design process, I work to create usable and polished work that just works and feels right. I like to focus on the little details, the pixel perfection that make my designs stand out from the ordinary. I'm looking for an exciting opportunity where I can utilize my creative and analytical skills for creating better products and experiences for the users.
